Buyer understands that the following ailments are not considered serious and therefore are not covered: intestinal parasites, fleas, ticks, ear mites, or other internal or external parasites, undescended testicles or allergies. Parvo, distemper, parainfluenza or other communicable disease are not covered since these can be caught at buyers home or where buyer has transported the pup. OCD is also not covered due to the complexity of the disease and condition/diet the dog is kept in once it leaves the sellers hands. Parents are health tested and radiographs of hips have been taken. Although parents hips are scored through OFA, this does not guarantee the pups will have excellent scoring hips. Workability of dogs is also not guaranteed due to each puppy being an individual. Buyer understands that seller will not be responsible for veterinary bills or any other expenses incurred in connection with, resulting from, or attributed to the care of this puppy, within the 48 hour period, or at any other time there after.

Buyer understands that all future shots or worming are the sole responsibility of the buyer.

It is the buyer's responsibility to maintain the dog at the proper levels of care. This guarantee is void if the dog is not cared for in a humane manner, fed proper food, and exhibits signs of mistreatment. A RAW diet is highly suggested but quality kibble such as Orijinn, EVO or Diamond are also good. The food "Taste of the Wild" and any "Blue Buffalo" food should be avoided at all costs. All puppies go home eating Diamond Naturals puppy food and it is best to keep them on this diet until you choose to slowly switch to a preferred brand of until they reach 10 months of age.

If for any reason buyer can not care for the puppy in any way or no longer wants the dog above mentioned, the breeder should be notified and the breeder has right to buy/take the dog back. This is to ensure no puppy or dog ever produced by Ravens View Farms ends up in a rescue or a shelter. This guarantee does not cover accidental injury. All appropriate shots for the dogs age have been given or will be, and a record of vaccination history is supplied.

The buyer is NOT to spay or neuter this puppy until they reach a minimum age of 24 months old. This is to aid in the proper maturation of the animals body and organs. Also new research shows that early spay and neutering of both sexes can lead to hip dysplasia. This puppy is not to be bred before 24 months of age and must have OFA hip clearances prior to being bred.
